

NUTRIKS[®]
PURE

VACUUM FOOD GRADE SALT FINE GRAINS

Fine salts for the production of food

Area of application

NUTRIKS Pure fine grains are used in food production as flavoring agents, preservatives and as an ideal carrier for health-promoting micronutrients such as iodine. The various fine grain sizes and the addition of iodine allow for a wide range of applications, especially in the processing of dairy products, snacks, spreadable fats and spice mixtures.

The Product

NUTRIKS Pure fine grains consists of high purity food grade vacuum salt with smaller grain sizes. We offer different grain sizes (micro fine, extra fine and calibrated fine) for different applications.

- Highest purity
- Complete solubility
- Different and uniform grain sizes
- Iodised variant available on request

VACUUM FOOD GRADE SALTS FINE GRAINS

Product properties

NUTRIKS Pure fine grains consists of high purity and fully soluble vacuum salt with smaller grain sizes to fulfill specific food product requirements. Optimum grain sizes, residue-free solubility and good flowability characterize the various K+S vacuum salt grades. The products offer the ideal surface properties in terms of binding capacity in spice mixtures and suspensions.

Product quality

NUTRIKS PURE fine grains is a high-purity vacuum salt with a Sodium Chloride content of at least 99.8%. This is achieved through an elaborate crystallization process and the use of a particularly pure and original brine. NUTRIKS Pure fine grains meet the requirements of the Codex Alimentarius and the FCC.

Certification

NUTRIKS Pure fine grains products meet the highest quality standards, as the production facilities are certified according to IFS or FSSC 22000, as well as EN ISO 9001. A comprehensive HACCP system ensures compliance with hygiene requirements. Kosher and Halal requirements are met.

Our Service

We provide our customers with products of consistently high quality. If required, we support our customers with competent technical application advice. A high level of reliable worldwide delivery is realised through effective and intelligent logistics by truck, vessel or rail.

Delivery range

Packaging size: 20 kg bag (49 × 20 kg per pallet)
25 kg bag (40 × 25 kg per pallet)
750 kg, 800 kg, 1000 kg big bag
Bulk

Type of packaging: PE-bag, PP-big bag (FIBC)

Composition: Vacuum food grade salt; with iodine (additive) on request

Grain sizes: Calibrated fine (0.50–0.125 mm)
Extra fine (0.355–0.063 mm)
Micro fine (<0.15 mm)

We will be happy to send you a sample on request. Please contact us if you wish to receive more information on this and other products.
